Lead Finder Turnover & Other Project Details

Nov 5, 2026

levi.young@contourinteriors.com.au Al-khair Pama

Website deployment review and research engine testing with cost scaling and future feature planning.

Centralized website and Lead Finder tool deployment

- Al-khair deployed the centralized website and provided exclusive login credentials to Levi.
- The research engine consumes significant RAM, necessitating future infrastructure upgrades.
- The Lead Finder tool executes targeted company searches for Sydney, generating detailed profiles and decision-maker data.
- Automated search runs will cover Perth, Adelaide, Melbourne, and Sydney, triggering email notifications upon completion.
- Levi will review search parameters with the team to adjust target company staff counts above 50.

Application access structure and dashboard development

- Application access will be restricted by role, reserving the research engine for sales and business development teams.
- A new management dashboard will be developed to extract financial and cross-departmental metrics.
- The existing sales dashboard will be evaluated for integration into the centralized platform.

Next steps

- ☐ [Levi Young] Purchase Domain: Coordinate with Dawn to finalize the acquisition of the domain for the new website.
- ☐ [Levi Young] Share Org Chart: Submit the organizational chart with specific access levels marked for each team member.
- ☐ [Levi Young] Share Access List: Provide a list of all personnel who require application

access, including their roles and departments.

- [ ] [Levi Young] Grant Dashboard Access: Grant developer access to the existing sales dashboard to facilitate integration.
- [ ] [Levi Young] Document Company Tools: Compile and send a comprehensive list of all software tools currently utilized by the company.
- [ ] [Al-khair Pama] Send Requirements Email: Email a summary of all outstanding action items and requirements discussed during the meeting.

Lead Finder Turnover & Other Project Details

Invited levi.young@contourinteriors.com.au Al-khair Pama

Attachments Lead Finder Turnover & Other Project Details

Meeting records Transcript

Summary

Website deployment review and research engine testing with cost scaling and future feature planning.

Website Deployment and Engine
Centralized website deployed successfully. Research engine tested with city searches.

Filtering and Geographic Focus
Filters adjusted for target company sizes. Geographic expansion tracking confirmed.

Access Levels and Management
User roles defined for platform access. Dashboard requirements and tool centralization discussed.

Decisions

Needs Further Discussion

- **Target company staff size filter threshold** Final confirmation of the target

staff size threshold for lead filtering was deferred pending feedback from the wider internal team.

Aligned

- **Email notification channel for automated runs** The participants aligned on using email as the notification channel for completed automated search runs.
- **Role-based access permissions for platform modules** The participants agreed to restrict Lead Finder research access to sales and business development while opening the company hub to all employees based on an annotated organizational chart.

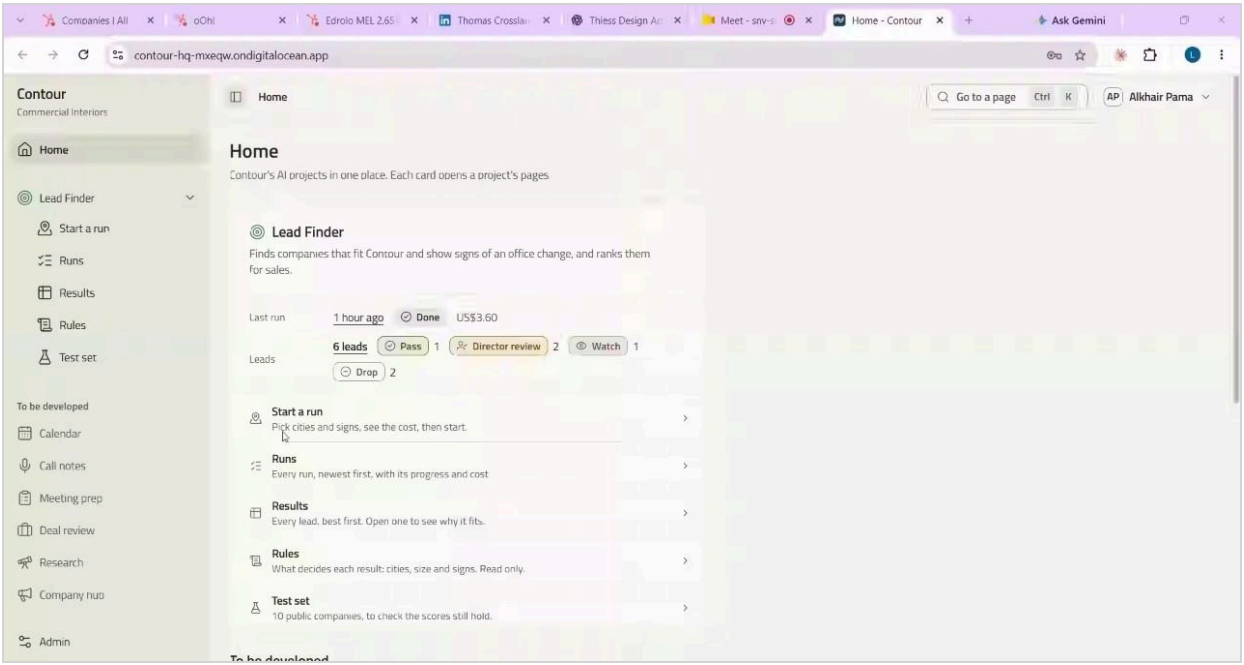

Next steps

- ☐ [Levi Young] Purchase Domain: Coordinate with Dawn to finalize the acquisition of the domain for the new website.
- ☐ [Levi Young] Share Org Chart: Submit the organizational chart with specific access levels marked for each team member.
- ☐ [Levi Young] Share Access List: Provide a list of all personnel who require application access, including their roles and departments.
- ☐ [Levi Young] Grant Dashboard Access: Grant developer access to the existing sales dashboard to facilitate integration.
- ☐ [Levi Young] Document Company Tools: Compile and send a comprehensive list of all software tools currently utilized by the company.
- ☐ [Al-khair Pama] Send Requirements Email: Email a summary of all outstanding action items and requirements discussed during the meeting.

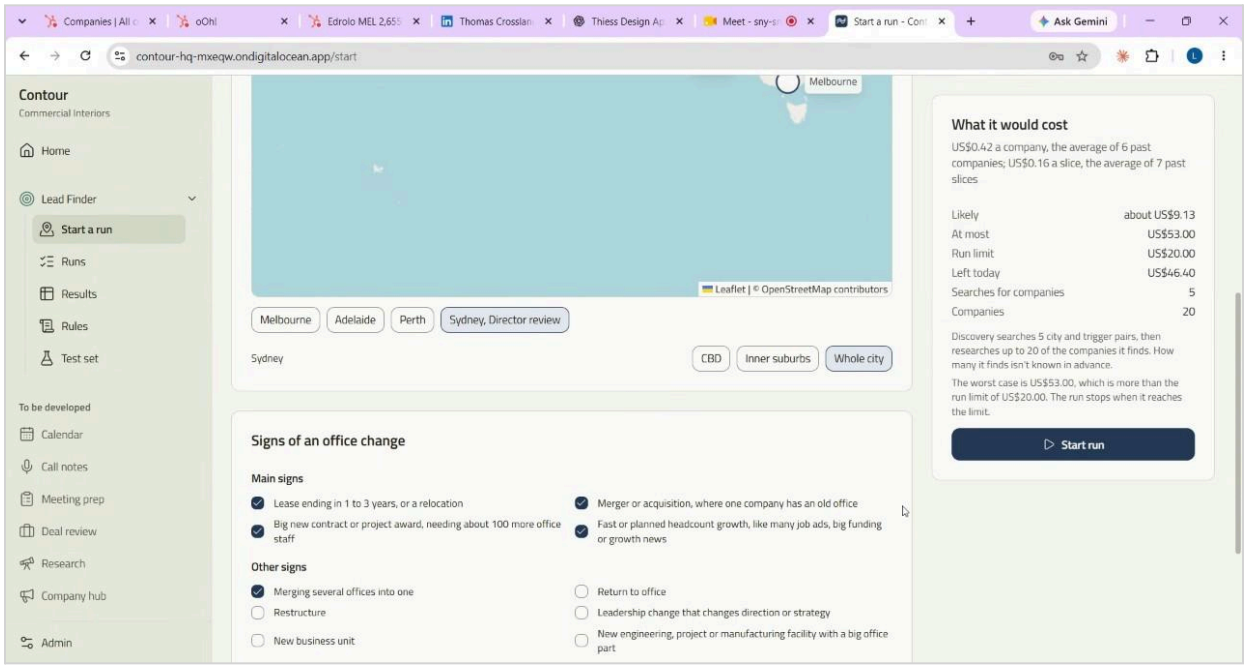

Details

Centralized Website Deployment and Access: Al-khair Pama informed Levi Young

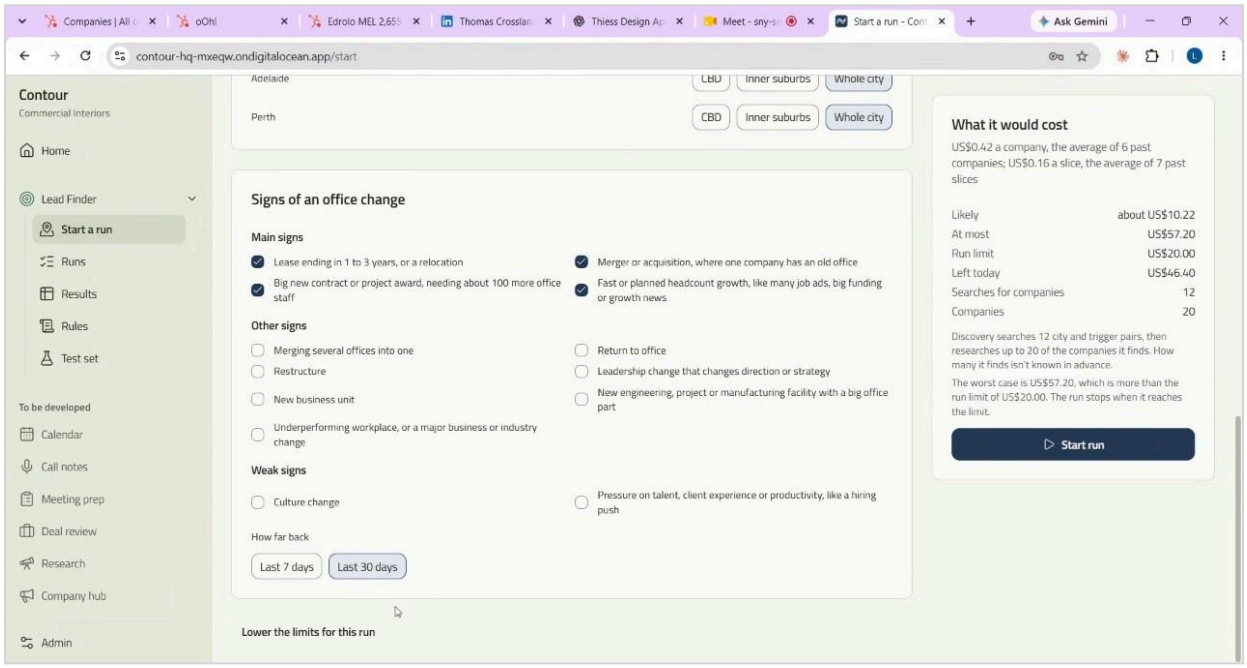

that the centralized website they are building has been successfully deployed and is currently accessible using a premature link. To maintain exclusivity, Al-khair Pama provided a username and password for authentication, which Levi Young entered to log into the platform during a screen share (00:04:04).

Research Engine Infrastructure and Performance: Al-khair Pama explained that the research engine requires substantial processing power and heavy random-access memory because Claude is utilized, noting that future hardware upgrades will be necessary (00:07:11). Levi Young and Al-khair Pama tested the engine by running a company search for Sydney on a whole-city level with a preset limit of twenty companies to balance cost and search depth (00:08:01).

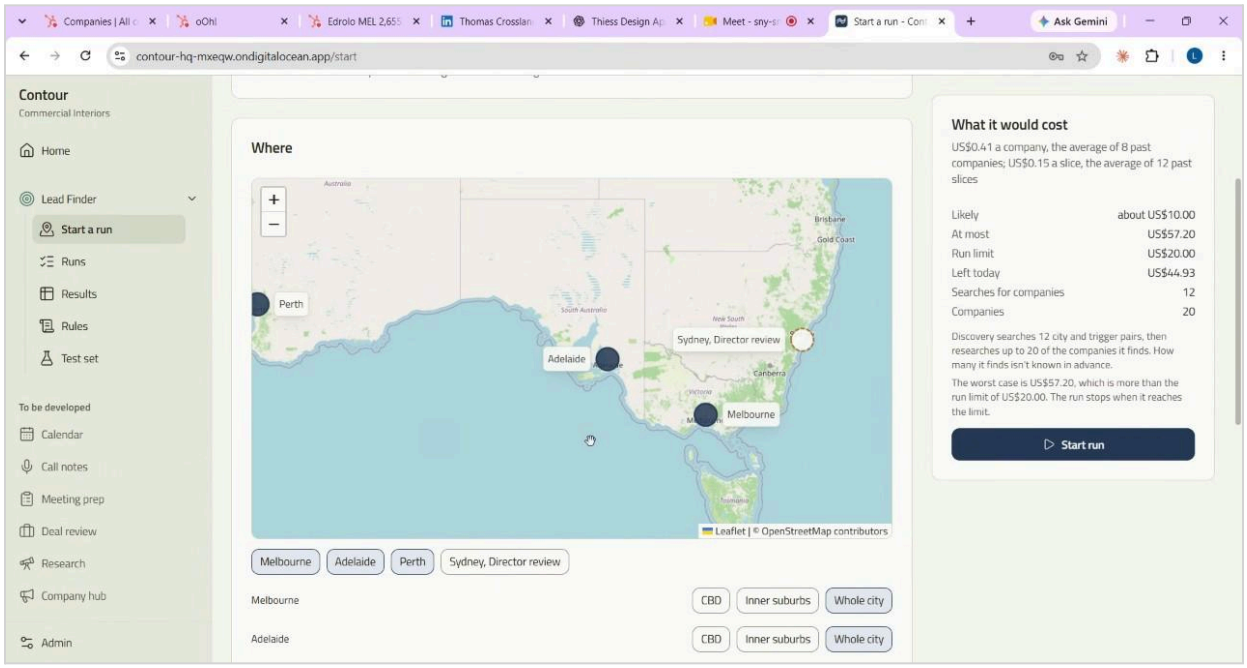

Research Engine Costs and Lead Volume Scaling: Al-khair Pama noted that search costs accumulate directly with the number of companies processed, with a sample run costing approximately one to five dollars (00:08:47) (00:10:24). Levi Young confirmed that their team is comfortable with significantly higher costs, estimating around one hundred to two hundred dollars for one hundred leads, provided the system delivers a substantial quantity of qualified leads every two weeks (00:15:15) (00:18:56).

Lead Review and Filtering Criteria: Al-khair Pama demonstrated how search results display criteria matching, summaries, and decision-makers sourced via SignalHire (00:11:14) (00:16:53). Levi Young suggested adjusting company size filters from smaller startups to businesses with fifty to seventy-five plus staff to target companies large enough for substantial office fit-outs, while Al-khair Pama noted that results can be reviewed internally before being sent to HubSpot (00:13:20).

Automated Run Notifications: Al-khair Pama asked where automated search run notifications should be delivered, and Levi Young requested that notification emails be sent directly to their email address (00:16:02).

Geographic Focus and Overseas Expansion Tracking: Levi Young inquired about automated searches covering their primary target markets of Perth, Adelaide, and Melbourne, and asked whether overseas companies announcing upcoming Australian office openings in Adelaide would be captured (00:19:47). Al-khair Pama confirmed that all four locations can be automated and stated that tracking overseas entities targeting Australia can be incorporated into the system (00:20:50).

Future Features and Mobile Application Support: Al-khair Pama highlighted that the platform is fully compatible with mobile applications. Levi Young proposed a future feature allowing users to input a specific company name to perform a quick background research check during phone calls (00:21:40).

Domain Purchase and Platform Coordination: Al-khair Pama requested that a proper domain be purchased for the website, noting that communicating directly with Dawn is faster and more efficient (00:22:31). Levi Young agreed to coordinate with Dawn to purchase the domain through providers like GoDaddy and instructed Al-khair Pama to send specific instructions via email to ensure proper setup (00:23:30).

User Roles and Organizational Access Levels: Al-khair Pama inquired about the beneficiary user base to properly configure administrative settings, and Levi Young explained that sales and business development teams will use the research engine, while the entire business will access the company hub (00:24:18). Levi Young committed to providing an organizational chart mapping specific department roles and access levels, noting that Lead Finder access will likely be restricted to specific personnel such as themselves, Marcus, and one other (00:26:19).

Management Dashboard Requirements and Tool Centralization: Al-khair Pama requested access to an existing dashboard to prepare for building a new management-focused dashboard that incorporates financial aspects across various business areas (00:28:13). Additionally, Al-khair Pama requested a list of tools currently used across the company to facilitate centralization within the new platform, which Levi Young agreed to review and follow up on via email (00:29:32).

Lead Finder Turnover & Other Project Details - Transcript

00:04:04

Levi Young: Good morning. How you going?

Al-khair Pama: Yeah. Morning. Good morning. Good morning, Levi. How was the week?

Levi Young: Yeah. Been very uh very hectic, but um yeah,

Al-khair Pama: Yeah.

Levi Young: it's Friday, so it's good.

Al-khair Pama: Yeah. So, um I have a good news for you. Um the centralized website, the the website we're building right now is already up.

Levi Young: Yep.

Al-khair Pama: I already deploy it. You can use it. And um what um let me let me just teach you. I mean I can send you the the the premature link of it because we still have to buy this um website a domain a specific domain.

Levi Young: Yes. Yes.

Al-khair Pama: Yeah. So I'll send the the website. Uh if it's possible you can show your screen for me to teach you how to like use use it. Yeah. So this will be Yeah.

Levi Young: for me.

Al-khair Pama: So then so you can show your screen.

00:05:12

Levi Young: Yep. I'll open the link.

Al-khair Pama: Oh wait a minute. Uh send me the credentials the password. Are you in the website right now?

Levi Young: Um, it's just needing username and password.

Al-khair Pama: Yeah. Yes. Because um that's the thing.

Levi Young: Yes. Yep.

Al-khair Pama: I mean,

Levi Young: Yep. That's good.

Al-khair Pama: yeah, because we we want to like like be exclusive with

Levi Young: Yes. Who accesses it?

Al-khair Pama: Yeah. So, wait, I'll provide the No,

Levi Young: Yep. Should I put my email address in?

Al-khair Pama: no, no. Um, because uh I put mine. So, I think this one is okay. But so, I'll just type in That's the um username and then is the

Levi Young: Yep.

Al-khair Pama: password.

Levi Young: Yep.

Al-khair Pama: Let me see. You can share your screen for me to see um guide you to it.

Levi Young: Yep. I'll just share screen.

Al-khair Pama: Yeah. So, is it already?

00:07:11

Levi Young: Yep.

Al-khair Pama: Yeah. So, is it So, yeah, that's that's we we we nailed the first project that we we did.

Levi Young: That's good.

Al-khair Pama: I mean,

Levi Young: Yeah.

Al-khair Pama: yeah.

Levi Young: Yeah.

Al-khair Pama: So the research engine is uh is kind of heavy when it comes to like running it.

Levi Young: Yep.

Al-khair Pama: So I think I think in the near future we want to upgrade in terms of like RAM, you know, RAM, right?

Levi Young: Yes. Yep.

Al-khair Pama: Yeah. So we need to upgrade because Claude uses a lot of RAM basically. So um yeah, you can start running by clicking those start it on. Yeah,

Levi Young: up at the top there.

Al-khair Pama: click those.

Levi Young: Yeah.

Al-khair Pama: Yep. And then you can just uh scroll down a bit. Yeah. No. Scroll.

Levi Young: Yeah.

Al-khair Pama: Scroll more. Yeah. Scroll. Yeah. So you can check what what are the signs that you are trying to see.

00:08:01

Levi Young: Yep.

Al-khair Pama: Yeah.

Levi Young: Here we are.

Al-khair Pama: So yeah.

Levi Young: Look at that. That's fantastic.

Al-khair Pama: Fantastic. Right.

Levi Young: Yeah.

Al-khair Pama: So you can just select like let's see um select merging new emphasis.

Levi Young: Um,

Al-khair Pama: Yeah. And then go to the top. the other top and let's say let's let's focus on on uh Sydney on Sydney.

Levi Young: yeah.

Al-khair Pama: No,

Levi Young: Or could it be Melbourne?

Al-khair Pama: no, no.

Levi Young: What is it?

Al-khair Pama: Uh well, let's let's focus first on Sydney because um I don't know.

Levi Young: Yes.

Al-khair Pama: No, no. Scroll down. Scroll down. Yeah. Yeah. So, you can in those bar.

Levi Young: Yes.

Al-khair Pama: No, no, no. Uh it's at the top. Yeah, that one. You can select You can click that. Yeah. Untick. Untick. Untick. And Yeah. And then you can select what what uh what level is it?

00:08:47

Al-khair Pama: Inner sub CBD or whole city.

Levi Young: Yes.

Al-khair Pama: So let's say um whole city. Let's let's Yeah.

Levi Young: Yeah.

Al-khair Pama: And then and let's try to run it. So you can check the the the the likely the cost that it would

Levi Young: Yep.

Al-khair Pama: take.

Levi Young: Oh yeah. Like

Al-khair Pama: Yeah. Which is great. Now start run. Click that.

Levi Young: um so when it says companies 20, would that is that would it likely find more than that or that's just what they expecting to find.

Al-khair Pama: Well, here's the thing. We I set it to 20 because the more that it search a company, the cost will also accumulate.

Levi Young: It will increase.

Al-khair Pama: So yeah,

Levi Young: Yeah. Yeah. Yeah. Yeah.

Al-khair Pama: they'll increase.

Levi Young: Y

Al-khair Pama: So let's let's keep it, you know, in between like balance. Yeah. So start the run because I I can just because I can just,

Levi Young: and this is so I was going to say yeah

00:09:35

Al-khair Pama: you know, I can just configure it. So yeah. So you can start the run,

Levi Young: and this is filtered based on like our target market like size and all the rest isn't it already?

Al-khair Pama: of course.

Levi Young: Yeah.

Al-khair Pama: Yeah.

Levi Young: Yep.

Al-khair Pama: Yeah. Yeah.

Levi Young: Just start run.

Al-khair Pama: So start the run and let's let's wait for a couple of minutes. Let's see the the beauty of it.

Levi Young: Yep.

Al-khair Pama: Yeah. So, it's running. It's running. Running currently.

Levi Young: So, so based on that then it's maybe it's better to run this every month

instead of week would you think? Or or is two weeks okay?

Al-khair Pama: I think well that depends on on your um what you need.

Levi Young: Depends on what we need. Yeah.

Al-khair Pama: I mean if if if if you need like a lead every week, every two weeks, then might be good.

Levi Young: Yep. Yep.

Al-khair Pama: But of course consider the cost but you know we have to but that cost is

00:10:24

Levi Young: Yeah.

Al-khair Pama: like probably like $5. So like it's the value that it brings to you is is much larger than

Levi Young: Yeah, that's right. We're happy for the cost if it's bringing the leads.

Al-khair Pama: the Yeah.

Levi Young: Exactly. And we're happy for it to be significant cost if it's bringing significant number of leads.

Al-khair Pama: Yeah. Yeah. Yeah.

Levi Young: So that's that's that's good.

Al-khair Pama: Yeah. Yeah. So yeah. So currently you can see the progress of it. Oh man. I mean I mean previously I'm having a hard time like the research engine you know because it's

Levi Young: Yeah.

Al-khair Pama: it yeah because you need to be like attached to detail.

Levi Young: Yeah.

Al-khair Pama: Yeah. So let's wait for it.

Levi Young: That is brilliant. Yeah. Let's see.

Al-khair Pama: And so so you can you can scroll down.

Levi Young: See what it does.

Al-khair Pama: You can scroll down.

Levi Young: Yep.

Al-khair Pama: You can scroll down and then see what happened.

00:11:14

Levi Young: Oh, yeah. That's what it's doing.

Al-khair Pama: You can see what's what what the AI is doing.

Levi Young: Yeah.

Al-khair Pama: Yeah, like what what sorts of articles, what sort of like you know sources they they they dig dig

Levi Young: Yeah.

Al-khair Pama: deep into. So yeah, um let's scroll to the top and yeah, let's see if So yeah, it found the two companies. Yep. So let's wait for another like search thing. Yeah. So that takes a while because of course it's a deep research but I would say like 15 minutes would be a great great thing. Yeah.

Levi Young: Yeah.

Al-khair Pama: So, so let's let's see on the results because I already run something on the results on the tab on the sidebar. Results. Click the results. Yeah, that one. So, I already had a research earlier early in the morning.

Levi Young: Yeah,

Al-khair Pama: So, you can see let's say click the forward deployed.

Levi Young: this

Al-khair Pama: Yeah. So, yeah. So, that's the thing that it is passed within our criteria.

00:12:21

Al-khair Pama: So, uh, it it it puts why it fits the best sign, right? And you can scroll it down. Yep. You can scroll down and then the summary of of it and then who to talk to basically the our decision makers to in the bottom at the bottom.

Levi Young: here.

Al-khair Pama: Yeah. So,

Levi Young: Yes. Yep.

Al-khair Pama: yeah.

Levi Young: Yeah, I see.

Al-khair Pama: Yeah.

Levi Young: Yeah. Okay, that's good.

Al-khair Pama: And then facts.

Levi Young: Um,

Al-khair Pama: You can go to facts. Yeah. Because um it this research is packed with a lot of information that you can like

Levi Young: yes,

Al-khair Pama: mesh around.

Levi Young: I say. Yeah. Yeah.

Al-khair Pama: Yeah. So some well what you

Levi Young: So, could we um based on the size?

Al-khair Pama: say

Levi Young: Oh, I was going to say, could we filter them out so that it um at

Al-khair Pama: I think

Levi Young: at limits to the ones that are say 75 plus staff?

00:13:20

Al-khair Pama: What do you mean? Um, could we like what?

Levi Young: Uh cuz this one's got four staff by the looks.

Al-khair Pama: I could this one be filtered,

Levi Young: Um yeah.

Al-khair Pama: right?

Levi Young: Yeah. So that we're we're talking to people that have got say um like well obviously typically 75 plus staff um but if it's a startup and it's going through growth maybe like 50 or something like that um because these I reckon this size won't um be big enough for an office fit out yet.

Al-khair Pama: Yeah. Yeah.

Levi Young: Um but the prince below it is fantastic cuz it gives you a huge amount of detail.

Al-khair Pama: Yeah. And you can send it to HubSpot if you want, you know.

Levi Young: Oh yeah. Oh yeah. Yeah. So what happens when you do send spot?

Al-khair Pama: Oh. Um let's let's not send it right now because of course um let's let's no no

Levi Young: Yeah. Still connecting it. Yeah.

Al-khair Pama: um we have to to to check if if that leads is great for us like

00:14:18

Levi Young: Yeah. I say yeah.

Al-khair Pama: that like we have to review it.

Levi Young: Yes.

Al-khair Pama: So the final decision making is in the of course you and all the the contour people internal team like that.

Levi Young: Yeah. Yeah.

Al-khair Pama: So you can check also the the scores in rules in research like that. Yeah.

Levi Young: Yeah.

Al-khair Pama: Then you can you can check the the size like the quick information. Yeah. Like that project size. Um and also yeah you can click that

Levi Young: Okay. Yeah.

Al-khair Pama: one.

Levi Young: Is it?

Al-khair Pama: Yeah. Yeah. You can click that one. Yeah. And then you can click the the size that Yeah.

Levi Young: Oh, yeah. Yep. I see. Yeah. Okay. So, what we could do then is just filter this size bracket to make it um of maybe it's 50 plus staff just to give us a bit of bandwidth. But um yeah, that's probably a good one there.

00:15:15

Al-khair Pama: Yeah. So, yeah. What do you think about it, brother?

Levi Young: That's fantastic. Yeah. Yeah. It's excellent to see how it's all come together.

Al-khair Pama: Yeah.

Levi Young: Um,

Al-khair Pama: Yeah.

Levi Young: so on a on a on a volume situation, if we were to say, you know, we want 100 leads,

Al-khair Pama: Yeah.

Levi Young: the cost of that is going to be what? Something like $200 or something, is it? Or Yes.

Al-khair Pama: I would say like 200 or 100 100 plus 100 plus but here's the thing

Levi Young: Yep.

Al-khair Pama: it is it is directly proportional with time and cost like if it's if you

Levi Young: Exactly. Yeah.

Al-khair Pama: wanted to like 100 leads that would take a lot an hour or of course I mean it's

Levi Young: Yep.

Al-khair Pama: a deep research though yeah so yeah

Levi Young: Yeah. Yeah. Yeah. That's good.

Al-khair Pama: so yeah that's good so um yeah I have a following question

Levi Young: That's fantastic.

00:16:02

Al-khair Pama: there.

Levi Young: Sorry, I just missed that bit.

Al-khair Pama: I have a following question though.

Levi Young: Yes. Yep.

Al-khair Pama: So, um where do you wanted to to get notified? Like let's say for example since we want to to to automate this one. We want to like be scheduled this one.

Levi Young: Yep.

Al-khair Pama: So where do you want it to be um auto notified like in the email or like in the HubSpot? Which which which channel?

Levi Young: Um, as in to say that the run has happened or that the

Al-khair Pama: Yeah, like that like the run. So let's say for example, hey the leads is ready like that and then yeah so

Levi Young: Oh, yeah. Email. Yep. Yep. Email to me.

Al-khair Pama: which email.

Levi Young: Yep.

Al-khair Pama: Okay.

Levi Young: Yep.

Al-khair Pama: So,

Levi Young: Um,

Al-khair Pama: um yeah.

Levi Young: that's probably the easiest for me.

Al-khair Pama: So, okay. So, that's I think that's the easiest of course. I mean I mean

why would I ask him such such

00:16:53

Levi Young: Yep. So, I think Yeah.

Al-khair Pama: questions?

Levi Young: So what I will do um I'll run through this with a couple of the other team here as well just to get their view on if there's any parameter adjustments you want to make like for example the size or those things and we can update them to you cuz I assume that's what now that we've got the structure we can tweak it a bit like if it's um target size of companies with 50 plus staff or 100 staff or whatever but did this

Al-khair Pama: Yep.

Levi Young: Um, so would this capture the staff numbers via signal? Is that how it works? Like signal highlinin.

Al-khair Pama: It it can it can it can get some some signal higher um details. I mean um I already integrated signal high there like that's the reason we

Levi Young: Yeah.

Al-khair Pama: get the decision maker because of course u most website or in the internet they don't want to like disclose their their people so signal so Here's the thing.

Levi Young: Yeah. Yeah.

00:17:59

Al-khair Pama: I think you wanted to like know each each people or that like the organization

Levi Young: Yeah, that's good.

Al-khair Pama: chart.

Levi Young: Yep. Yep. The other one.

Al-khair Pama: That's what you want.

Levi Young: Yeah. Yeah. Exactly. Yeah. The other one we could um um

Al-khair Pama: H my my my opinion for that my opinion for that brother is that that would that would um cost but not on the clot but on the signal high because of course you want a lot of leads. So yeah.

Levi Young: Yeah, that's good. Um, this is excellent to see you come together. Thank you, Al. You've done a great job there. Um,

Al-khair Pama: Yep.

Levi Young: I'll go through that today and just see what else we want to um tweak. But yeah, the primary thing would be that um in terms of the companies that come through their size is is such um of you know where they're going to do a substantial size fit out.

Al-khair Pama: Yep.

00:18:56

Levi Young: Um the thing with um these other ones or sorry I'll go back to the runs.

Al-khair Pama: Runs. So I think the runs are already there. Already done.

Levi Young: Yep. Yep.

Al-khair Pama: You can check it. Yeah, the recent one.

Levi Young: So this was this one.

Al-khair Pama: No, no, no, not that,

Levi Young: Yep.

Al-khair Pama: not that one. I think No, the one that Yeah, that one. So you can see.

Levi Young: Yep. Yep.

Al-khair Pama: So it just generate key.

Levi Young: Yep. So in terms of this cost here where we've got I think it was US one whatever like we'd be happy Yeah.

Al-khair Pama: $1.

Levi Young: We'd be happy for that to be significantly higher if it was giving us like a you know quite a batch of leads. Um,

Al-khair Pama: Yep.

Levi Young: assuming like let's say it's like we're paying every two weeks to buy a list of leads, so to speak, qualified leads, that's um, we're fine with that.

Al-khair Pama: Yep.

Levi Young: Um,

00:19:47

Al-khair Pama: So,

Levi Young: yep.

Al-khair Pama: um yeah. Um I mean um you can just I mean thank um the reason that I made it like a you know small cost because of course it's it's the first phase.

Levi Young: First thing. Exactly. Yep.

Al-khair Pama: Yeah.

Levi Young: This is brilliant. No, the um uh very very pleased with how it's come together. So, uh you put a lot of hard work into this, so that's fantastic.

Al-khair Pama: Yep.

Levi Young: Thank you.

Al-khair Pama: Yeah. So, uh,

Levi Young: Um um

Al-khair Pama: do you have anything to to add on that or

Levi Young: I'm just thinking with Yeah,

Al-khair Pama: later?

Levi Young: I might have a walk like a walk through it and then maybe I can jump on another call later and just ask you some questions once I've looked at it. One I was just thinking about with the um obviously our primary markets being Perth, Adelaide,

Melbourne, would that be where the where the automated runs would come from or would we do a whole lot or the auto auto uh automated um searches?

00:20:50

Al-khair Pama: I mean that would be automated that that would be automated at all for

Levi Young: Yeah.

Al-khair Pama: for Yeah.

Levi Young: All four. Yep. Yep.

Al-khair Pama: Yeah.

Levi Young: And I think we might have talked about this previously, but like what if it was a company that's based overseas, but there's been an announcement in the news in Australia say that they've going to open up an office in Adelaide. Would we capture that in Adelaide search because it's to do with Adelaide? Is that how it would be captured?

Al-khair Pama: Um, we can we can have an like um an overseas that is based on Australia. We can do that.

Levi Young: Yeah.

Al-khair Pama: But I think yeah,

Levi Young: Yeah, I think that would be interesting.

Al-khair Pama: that would be interesting. That would be interesting though. But since um you know I I I align the the the focus first on on this one.

Levi Young: Yeah. Yes.

Al-khair Pama: So I can just add that add those. Yeah.

00:21:40

Al-khair Pama: But I think um you know the research engine is is is packed with a lot of like information that you can use. So that would be Yeah.

Levi Young: Yeah. Yeah.

Al-khair Pama: So

Levi Young: And and we can add if we think of other signs, we can add to that here, I suppose, can't we? If we think of other things that could be part of it.

Al-khair Pama: yeah.

Levi Young: Yep. So that's that's um brilliant.

Al-khair Pama: Yes.

Levi Young: No, I'm really happy with that.

Al-khair Pama: Yes.

Levi Young: I can and I can see these other projects here,

Al-khair Pama: Yep.

Levi Young: which is great.

Al-khair Pama: Yep.

Levi Young: Um I think what would be really good maybe as the next one is that, you know, that preset little research um when we're ringing a company that we can just put the

Al-khair Pama: Yep.

Levi Young: company name into and it does the little background research. that that could be really handy. Um, and the next one.

Al-khair Pama: Yeah. So the thing about this brother is that you can use it on mobile application like you can like you can use it.

00:22:31

Levi Young: Yep. Yeah.

Al-khair Pama: Yeah.

Levi Young: Yeah.

Al-khair Pama: Like you can just um it's fantastic.

Levi Young: That's fantastic.

Al-khair Pama: So um uh what else do I need from from you? So I think I have a few question here. is prepared.

Levi Young: Yep. Yep.

Al-khair Pama: So, um yeah. Um I hope this day um you can like tap done with the the

Levi Young: Yes.

Al-khair Pama: with the domain of this one.

Levi Young: Okay. Yeah. Yeah, I can follow that up. Yep. So, um, have you sent that to her to buy? Is that right? She'll buy a domain.

Al-khair Pama: Uh well um the the one thing about about it is that I I want I want us me and Don to communicate with what's because it's it's faster, you know.

Levi Young: Yep.

Al-khair Pama: It's it's much faster and efficient. So I think we sometimes we just um I forgot that the the outlook pass through because uh you know the there are lot of like emails that is override.

00:23:30

Levi Young: Yeah,

Al-khair Pama: So yeah.

Levi Young: that might be best.

Al-khair Pama: So yeah.

Levi Young: Yep.

Al-khair Pama: Yeah. So a proper domain for this one,

Levi Young: Yep.

Al-khair Pama: you can just send it to me and then I mean not send the domain itself but add me to that like like platform that you you bought a domain for.

Levi Young: Oh. Um, once she's bought it,

Al-khair Pama: Yeah.

Levi Young: you mean? or or the all the

Al-khair Pama: Like like for examp where do you buy a domain though in GoDaddy? Hey.

Levi Young: uh I I think that's one of them. I haven't done it for a while, but yeah, we can easily do that. Yeah. Yep.

Al-khair Pama: Yeah. So,

Levi Young: If you send us through um and copy me into it if you want of like exactly what you need um and all the rest, I'll follow up Dawn today and then also just make sure that that can happen.

Al-khair Pama: yep.

Levi Young: So you So yeah, so it doesn't impact you at all.

00:24:18

Al-khair Pama: Yep. Yep. I can just pack into But here's here's another question though.

Levi Young: Yep.

Al-khair Pama: So um this is like not just on the Lead Finder but on the whole project itself.

Levi Young: Yep.

Al-khair Pama: Who do you think is the beneficiaries of this projects?

Levi Young: So, what was that? Who was the what?

Al-khair Pama: I mean of course beneficiaries of this project like the users user base

Levi Young: Sorry.

Al-khair Pama: who like yeah

Levi Young: Oh, um of this research project or the whole uh application.

Al-khair Pama: as a whole as a whole application because I'm

Levi Young: Well, yeah. Sorry. Go on.

Al-khair Pama: Yeah, because I'm think that I'm I'm questioning this too because um of course for me to like get ready to to to set up the users, right?

Levi Young: Yep.

Al-khair Pama: Because of course I'm I'm the um you know developer admin.

Levi Young: Yep.

Al-khair Pama: So I'm I'm the one who is who has supervised this one. So basically I wanted to know who is the user for that.

00:25:15

Levi Young: Yep.

Al-khair Pama: So may mind if you can tell me who were those persons

Levi Young: Yep. it would be um in its entirety once it's fully set up would be expecting the whole team to be using it um in some form. Um I suppose things like the company hub we would restrict access to certain persons. So some would have more access than others. Um so that it's sort of like an application where depending on the preferences or criteria whatever we set uh some would have access to more parts of the of the website than others.

Al-khair Pama: Yeah. Yeah. that I mean yeah I I know that part like um some part some people have I mean not everyone

Levi Young: Yep.

Al-khair Pama: has the same access level but let's say what what like the identity of those person like is it a saleserson like the marketing people like that yeah that's what I'm

Levi Young: Oh yeah. Yeah. No, yeah. Yeah. Yep. So, so it' be primarily sales for the research.

00:26:19

Levi Young: Yeah.

Al-khair Pama: asking yeah sales I'm going to write it

Levi Young: Sales for the research part of it. Sales and business development. Yep. Sales, business development.

Al-khair Pama: so sales target.

Levi Young: Um, but Yep. marketing. But for the research hub or for sorry, not research, for the company hub, for like the pages that we'll build for overall company information and so forth. Um that would be everyone across the whole business.

Al-khair Pama: Oh, everyone. Yeah.

Levi Young: Yep.

Al-khair Pama: So, so mind if you can like gave me like a structure

Levi Young: Yeah.

Al-khair Pama: or I mean you have Yeah,

Levi Young: I can give you the orchart like a orchart. Yeah.

Al-khair Pama: because you have a lot of like I believe employees and other extended Uh me.

Levi Young: Yep.

Al-khair Pama: extended office. So if if you can like provide me that.

Levi Young: Yep. I can give you the org chart and then perhaps with um I could even mark up who would have access to what on the org chart.

00:27:10

Al-khair Pama: Yeah.

Levi Young: So I could circle the teams that are like the company the this particular Lead Finder I suspect would be pretty restricted. Um, it might be myself and Marcus that would have access to this and maybe one other. Um, because this is this is sort of the the back end of it. We would we would find the leads, but we wouldn't have many people seeing how we're finding them.

Al-khair Pama: Yeah. Yeah, I can do that. And uh yeah. uh later you can just send to me the the the peoples like that who who are the people who has the access what is their role in their company in the company like is it are

Levi Young: Yep.

Al-khair Pama: they belong to what what department has yeah so

Levi Young: Yep.

Al-khair Pama: next one is uh uh yeah uh so uh I'll be asking for the copy of the dashboard that you told me last

Levi Young: Yes. Yep.

Al-khair Pama: time maybe you add had add me because

Levi Young: Yep. Do you want me to add you?

00:28:13

Levi Young: Add you. Yep.

Al-khair Pama: yeah because um that that will be the next project. I mean I will be doing two project at the same time like the calendar and the dashboard because dashboard will be some some I mean it's it's kind of easy to be honest now I mean as long

Levi Young: Yeah.

Al-khair Pama: as there's there's a data so you just need to plug in those data so yeah mind if you

Levi Young: Yeah.

Al-khair Pama: can add me to that and another one is um what sort of d I mean what sort of dashboard do you want like you you've said that not the whole dashboard is the same, right?

Levi Young: No. So the one that the primary one like the the sales one that we've got we're quite happy with how it works. Maybe just a matter of integrating it into this somehow or happy to have it separate if it's easier. But the next the dashboard that we want to build here would be one um it's more like a management dashboard that would extract um things to do with well I guess all all departments but there's some particular

finance um aspects of it um and I might get a couple of the others on the call to run you through it because I'm not across the detail of it but that would be the primary dashboard which would be sort of like a management view um

00:29:32

Levi Young: of the various areas of the business. Um that would be the the primary one. Then the other one that we've got going for business development in particular um once you get on to that you'll be able to see how that works like as it is happy with that. If it can be easily copied across into this central um website,

Al-khair Pama: Whoops.

Levi Young: that's fine as Well,

Al-khair Pama: Yeah.

Levi Young: but as it is,

Al-khair Pama: Yeah.

Levi Young: it's not a high priority to change that. It's more just the new dashboard of management um sort of things.

Al-khair Pama: Okay. Okay. That would be that would be great weather. So, uh another one. So maybe later uh you can also provide me the list of tools that you are currently using in in the company because of course we want to

Levi Young: Yep.

Al-khair Pama: centralize everything every everything inside this this this uh yeah

Levi Young: Yes. Yes. Exactly. Yep.

Al-khair Pama: so so provide

Levi Young: If you could perhaps put that onto an email like those points we've discussed um to me um directed to me, I will get through those perhaps even I might have another call.

00:30:46

Levi Young: I've got a meeting started at 8:30. So, I'm just getting a couple of things ready for that um shortly and then that

Al-khair Pama: Yep.

Levi Young: would be great. I think that we can get all that happening, but I think it's just fantastic to see it all coming together on this uh on this site.

Al-khair Pama: Yeah. So, yeah. Um yeah, I can just send you the the the email for this one for the things that you you you need to do with with

Levi Young: Yep.

Al-khair Pama: your um Yeah.

Levi Young: Yep. Yeah.

Al-khair Pama: So um well, basically how how was the Lead Finder?

Levi Young: Fantastic. Yeah, it's uh brilliant. I think it's I think it's got the uh the structure and the capacity that we really need. So, I'll just make these get these extra bits of information from the others as to what else they want in there. But I think what you've done has been uh brilliant. So, thanks very much. Appreciate your help.

Al-khair Pama: Yep. Yep. Yep. So,

Levi Young: Good job.

Al-khair Pama: I decided Yep.

Levi Young: Anyway, yep.

Al-khair Pama: So,

Levi Young: And I'll come back to you on those.

Al-khair Pama: yeah. Peace.

Levi Young: Thank you.

Al-khair Pama: Peace.

Levi Young: Yeah. Have a great morning. Talk soon. Cheers. Cheers. This way.
