Meeting records Transcript

Summary

Lead generation criteria reviewed and data tools evaluated via CRM integration and custom scheduling plans

Lead Generation Criteria Setup
Target companies identified using specific staff and tenure metrics. Signal Hire selected for data testing.

CRM and Tool Integration
HubSpot data managed and Claude integration planned. Custom web tool discussed for pipeline tracking.

Decisions

Aligned

- **Adoption of Signal Hire for data extraction** The team agreed to utilize Signal Hire as a third-party tool to extract headcount numbers and integrate with LinkedIn.
- **Development of a calendar scheduling tool** The participants agreed to build a calendar scheduling tool using the Microsoft API to coordinate meeting times

across states.

- **Adoption of a project management tool** The participants agreed to implement a project management tool to track and organize ongoing project workflows.

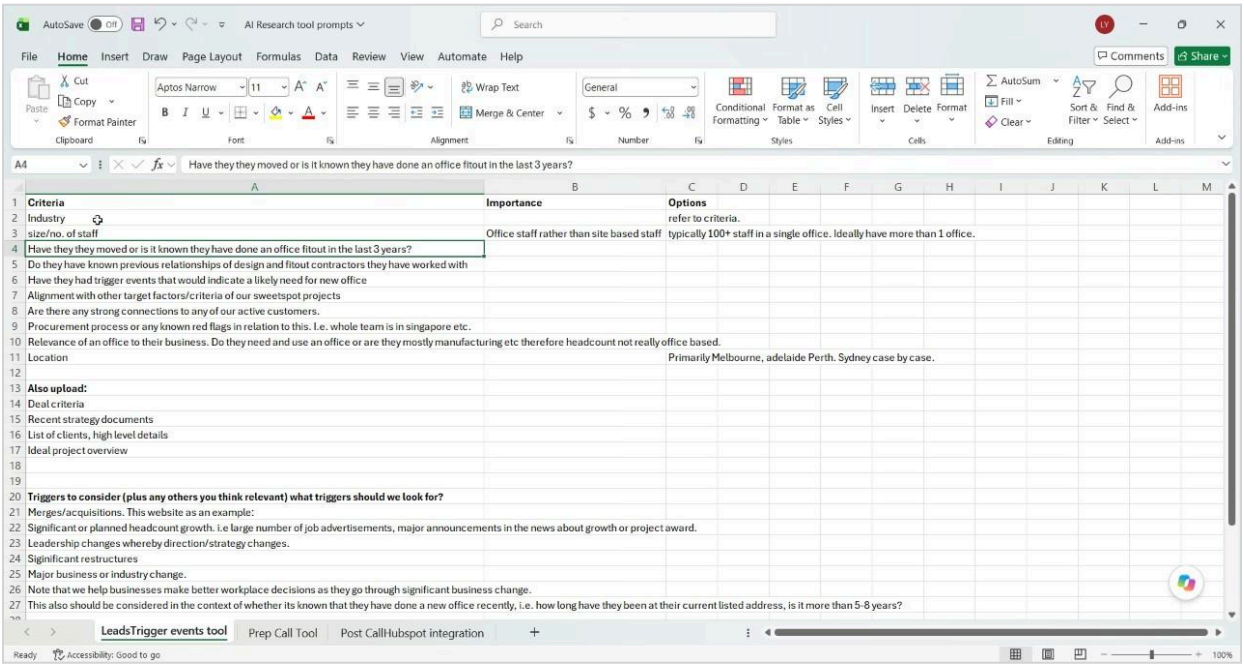

Next steps

- ☐ [Al-khair Pama] Extract Headcount Data: Integrate Signal Hire or Apollo with the system to extract headcount data for leads. Focus on resolving the LinkedIn data scraping restrictions.
- ☐ [Levi Young] Provide Tool Account: Provide Al-khair Pama with an account for the chosen data extraction tool to facilitate integration.
- ☐ [Levi Young] Share Project Criteria: Send a list of target projects, current client data, and the deal criteria to Al-khair Pama for research context.
- ☐ [Levi Young] Answer Research Questions: Answer the pending questions provided in the project document to clarify research requirements.
- ☐ [Al-khair Pama] Email Task Summary: Email a summary of the action plan and upcoming tasks to Levi Young.
- ☐ [Levi Young] Configure Claude CRM: Install the Claude desktop application and configure the HubSpot connector to enable CRM logging via voice dictation.
- ☐ [Al-khair Pama] Build Scheduling Tool: Develop a calendar scheduling tool that integrates with the existing system to suggest meeting times based on team availability.
- ☐ [Al-khair Pama] Invite to Project Management: Send an invitation to the project management tool to Levi Young to track project progress.
- ☐ [Levi Young] Provide API Access: Send an invitation for the Claude API access to Al-khair Pama.
- ☐ [Levi Young] Schedule Weekly Meeting: Schedule a recurring Monday morning catch-up meeting in the calendar.

Details

Lead Generation Criteria and Office Fit-Out Triggers: Levi Young identified target companies as those with approximately 100 staff, a tenure of seven to eight years at the same address, and no recent news of office fit-outs. Al-khair Pama acknowledged these criteria while noting potential data-gathering challenges on platforms like LinkedIn.

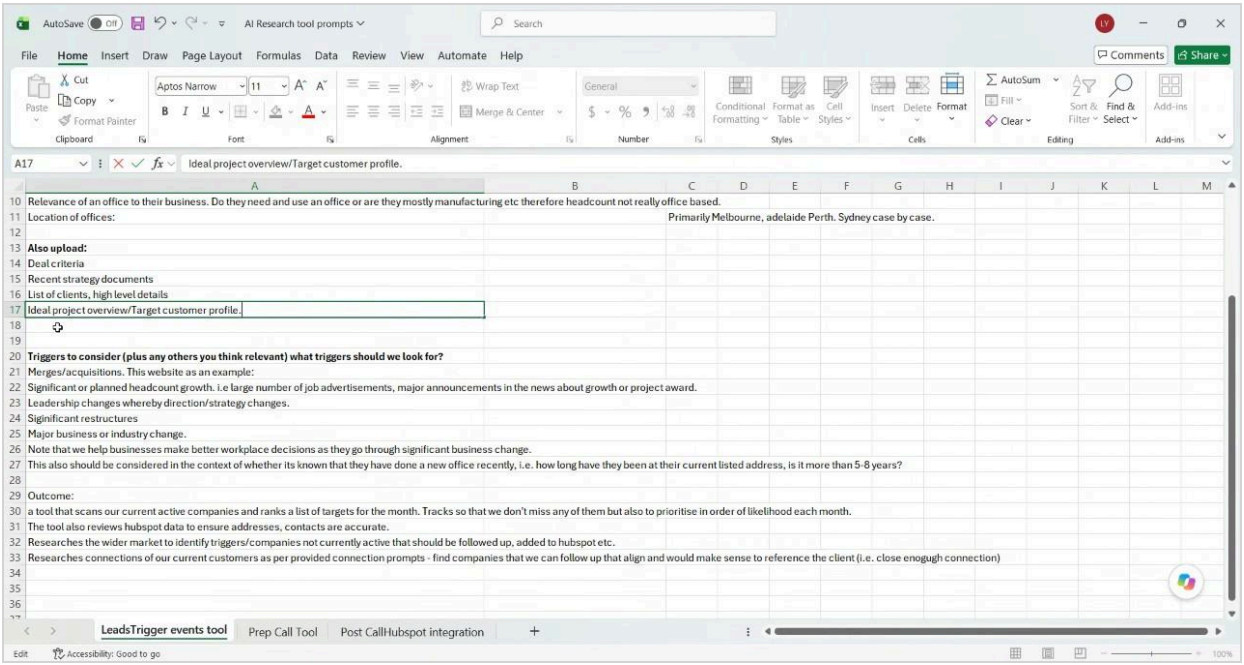

Third-Party Data Integration Tools for Staff Headcounts: Al-khair Pama explained that direct scraping of LinkedIn risks IP address bans for the system (00:03:48). To resolve this, Levi Young suggested utilizing third-party helper tools such as Signal Hire and Lusha, while Al-khair Pama proposed Apollo as an alternative. Al-khair Pama decided to test Signal Hire based on its documentation, and Levi agreed to provide an account (00:02:34) (00:04:49).

	A	B	C
1	**Criteria**	**Importance**	**Options**
2	Industry		refer to criteria.
3	size/no. of staff	Office staff rather than site based staff	typically 100+ staff in a single office. Ideally have more than 1 office.
4	Have they they moved or is it known they have done an office fitout in the last 3 years?		
5	Do they have known previous relationships of design and fitout contractors they have worked with		
6	Have they had trigger events that would indicate a likely need for new office		
7	Alignment with other target factors/criteria of our sweetspot projects		
8	Are there any strong connections to any of our active customers.		
9	Procurement process or any known red flags in relation to this. I.e. whole team is in singapore etc.		
10	Relevance of an office to their business. Do they need and use an office or are they mostly manufacturing etc therefore headcount not really office based.		
11	Location		Primarily Melbourne, adelaide Perth. Sydney case by case.
12			
13	**Also upload:**		
14	Deal criteria		
15	Recent strategy documents		
16	List of clients, high level details		
17	Ideal project overview		
18			
19			
20	**Triggers to consider (plus any others you think relevant) what triggers should we look for?**		
21	Merges/acquisitions. This website as an example:		
22	Significant or planned headcount growth. i.e large number of job advertisements, major announcements in the news about growth or project award.		
23	Leadership changes whereby direction/strategy changes.		
24	Siginificant restructures		
25	Major business or industry change.		
26	Note that we help businesses make better workplace decisions as they go through significant business change.		
27	This also should be considered in the context of whether its known that they have done a new office recently, i.e. how long have they been at their current listed address, is it more than 5-8 years?		

Additional Target Criteria and Customer Connections: Levi Young outlined further selection criteria, including checking for competitor relationships, leveraging connections to current customers (such as shared advisory board memberships) for referrals, and avoiding complex procurement processes or non-office environments

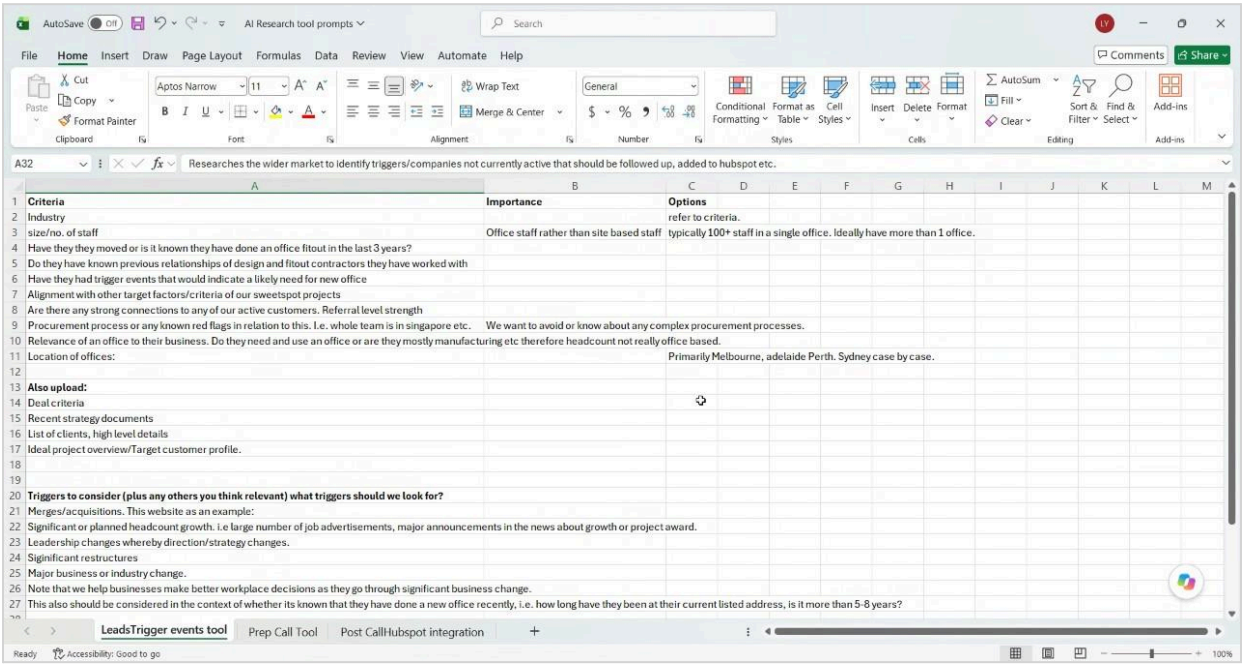

like warehouses (00:05:43). Target locations include Melbourne, Adelaide, Perth, and Sydney. Levi committed to sharing deal criteria, strategy documents, client lists, and trigger events such as government-listed mergers and acquisitions, headcount growth, and leadership changes (00:08:09).

HubSpot Data Management and Validation: Levi Young and Al-khair Pama discussed utilizing a tool to review and clean up data in HubSpot. Levi demonstrated how company details—such as active status, addresses, office space size, lease expiry, and manual headcount per city—are entered into HubSpot (00:10:47). Al-khair Pama confirmed familiarity with importing CSV and Excel files and noted that Claude could assist with these calculations (00:12:23).

System Demonstration and Decision-Maker Research: Al-khair Pama shared their screen to demonstrate a current research tool run, displaying company scores and research costs (00:14:35). Levi Young confirmed that identifying decision-makers and obtaining talking points would be beneficial (00:15:42). Al-khair Pama stated they would email the criteria adjustments and next steps (00:16:48).

Claude and HubSpot CRM Integration: Levi Young asked about integrating Claude

with HubSpot to dictate and log calls and meeting notes. Al-khair Pama explained the setup process for principals, which involves installing the Claude desktop app, navigating to connectors, selecting HubSpot, and connecting (00:17:51). Levi asked if this should be deployed for other business development team members, and Al-khair Pama agreed, noting it will help automate workflows and reduce scattered tool usage (00:18:46).

Calendar Scheduling Tool Development: Noting scheduling difficulties across different offices, Levi Young asked about creating a tool to read team calendars and suggest optimal meeting times (00:19:42). Al-khair Pama confirmed that integrating Microsoft's API for this purpose is feasible. Levi agreed that this calendar scheduling tool will be the next project following the current lead generation system (00:20:56).

Custom Web Tool for Centralized Project Management and Pipeline Tracking: Levi Young inquired about the best platform for handling pre-meeting forms. Al-khair Pama recommended building a custom website tool rather than using HubSpot's static interface to centralize scheduling, communication channels like WhatsApp and Microsoft, and project meetings (00:22:02). Levi suggested that the tool could also track pipeline deals, alert users if a deal has been untouched for three weeks, and automate daily tasks (00:23:02). Al-khair Pama offered to add Levi to a project management tool and requested an invitation for the Claude API and confirmation of Digital Ocean credentials (00:24:09).

Routine Meeting Cadence: Al-khair Pama suggested reducing unnecessary meetings in favor of asynchronous updates (00:25:59). Levi Young proposed establishing a routine Monday morning check-in meeting on culture and project status, supplemented by messaging during the week as needed (00:26:47).
